

# Coronado Gold Tall Fescue

## Disease Resistance

Coronado Gold exhibits excellent disease resistance for premium turf performance throughout all areas of tall fescue adaptation. It has a 98% endophyte level for improved insect resistance and has a very good tolerance to brown patch.

## Recommended Uses

With a uniform, dense turf providing dark green color, Coronado Gold is highly recommended for home lawns and professional turf applications, where a deep, infrequent irrigation can be maintained which promotes deep, healthy root systems.

## Performance Characteristics

Tolerates full sun to moderate shade and demonstrates superior traffic and wear tolerance. Coronado Gold has an excellent overall performance in heat and humidity.

## Seeding Information

Seed at 6-10 lbs. /1000 sq. ft. or 400 lbs. per acre in early fall or spring. Avoid late spring and summer plantings in areas of high heat and humidity. The seed bed should be kept moist during germination and establishment. First mowing is recommended when the plant reaches 2 to 3 inches in height.

### Mean Turfgrass

NTEP 1997 - 2000 Data

Name	Mean
<b>Coronado Gold</b>	<b>5.6</b>
Falcon II	5.6
