

Perennial Ryegrass Blend

RX perennial ryegrass blend is a great addition to your turf lineup. We put three excellent performing deep green turf type perennial ryegrasses in the blend, making a great combination for turf. Rx perennial ryegrass blend consists of Buena Vista, Overdrive, Halo or Fusion or other elite perennial ryegrass varieties. These varieties are extremely dark green and dwarf. Rx has shown great performance in trials and overseeding use. Rx perennial ryegrass blend is a problem solver for any golf course superintendent or professional sports turf manager who is looking for a reduction in clippings and maintenance. Its endophyte content increases insect resistance and stress tolerance. This makes Rx perennial ryegrass blend a great turf for golf course fairways, lawns, and athletic areas in full sun. Rx perennial ryegrass blend has improved resistance to brown patch and rust as well as a shorter vertical growth habit.

Performing well in southern overseeding, Rx perennial ryegrass blend can be mowed as low as 3/16" with great results in full maintenance programs. It is also well suited for lawns and turf areas with mowing heights up to 2 inches. Germination time is fast with Rx perennial ryegrass blend, generally three to ten days with irrigation.

If you are looking for a dark green turf that generates fewer clippings and saves on maintenance throughout the season... use Rx perennial ryegrass blend.

- ◆ *New and improved*
- ◆ *Fast germinating*
- ◆ *Excellent turf color & quality*
- ◆ *Short mowing ability*
- ◆ *Great for overseeding*
- ◆ *Improved versus gray leaf spot*

Dormant Southern Overseeding:

Sports turf: 10# per 1000 square feet

Lawns & Fairways: 8-15 # per 1000 square feet

Tees and Greens: 20-35 # per 1000 square feet
