

# SUN DEVIL II

## Seeded Turf-type Bermudagrass

### ATTRIBUTES

☆'s 5 = Outstanding, 4 = Very Good, 3 = Good, 2 = Moderate, 1 = Poor

- ★★★★★ Traffic Tolerance
- ★★★★★ Drought Tolerance
- ★★★★★ Reduced Scalping

- ★★★★★ Improved Winter Hardiness
- ★★★★★ Rapid Establishment
- ★★★★★ Shade Tolerance

**SunDevil II** is a uniform, low growing, seeded turf-type bermudagrass. It has a medium-dark green color, medium-fine texture, and high density.

### PERFORMANCE HIGHLIGHTS

**TURF QUALITY ASSESSMENT:** **SunDevil II** was entered in the bermudagrass NTEP trial that is being grown at many sites in the US. **SunDevil II** has been tested in Jacklin trials at Post Falls, ID, and Poolesville, MD, and it has been one of the best performing bermudas at these locations.

**IMPROVED ATTRIBUTES:** **SunDevil II** offers many improvements over the old 'SunDevil' including better quality, density, texture, greenup, and seed yield. In Maryland trial, **SunDevil II** had excellent performance, better than Numex-Sahara, Cheyenne, Sonesta, C-2, Guymon and Arizona common. **SunDevil II's** spring greenup surpassed Cheyenne, C-2, Jackpot, and Yuma. **SunDevil II** also exhibited a darker green color than Guymon, Cheyenne, C-2, and Arizona common in this same trial.

**SEEDING RATE:** Hulled seed at 2-3 lbs. per 1,000 sq. ft. (10-25 g/m<sup>2</sup>).

**MULTIPLE USES:** **SunDevil II** adapts readily to lawns, parks, roadsides, cemeteries, golf course roughs and fairways, and other sports areas where bermudagrasses are grown. In many situations, **SunDevil II** can be used as a replacement for vegetative bermudagrasses, which can be costly and time consuming to establish.

**WIDE RANGE OF ADAPTATION:** **SunDevil II** is recommended for golf course fairways and roughs, home lawns, parks, and business landscapes. It is also for use on other sports areas in warm-humid and warm-semiarid regions and the warmer areas of the transition zone. In many situations, **SunDevil II** can be used as a replacement for vegetative bermudagrass which can be costly and time-consuming to establish. **SunDevil II** is a good choice when used alone or matched with other Jacklin bermudagrasses in blends for permanent turf in temperate zones.
