

Creeping Red Fescue

Trapeze

Product Sheet

CHARACTERISTICS

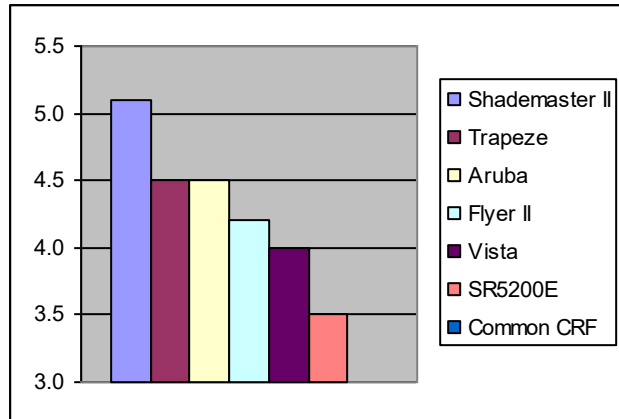

Trapeze strong creeping red fescue is an advanced generation synthetic cultivar selected from the half-sib progenies of five clones. The variety was screened for turf uniformity, resistance to net blotch, resistance to powdery mildew and high seed yield.

In turf trials, Trapeze has improved turf density and a brilliant green color for an attractive, high quality turf.

Trapeze has also shown good resistance to red thread and powdery mildew.

TRIAL DATA

1998 Rutgers Turfgrass Proceedings
Turf Quality
1998 Average
Ratings 1-9, 9=Ideal Turf

SEEDING RATE

4-6 LBS/1,000 square feet for new establishment
2-3 LBS/1,000 square feet for overseeding

BENEFITS

- Improved Turf Quality
- Excellent Density
- Resistant to Red Thread
- Resistant to Powder Mildew
